WEB Front-to-end

Gender : Male Age : 24

Tel: +86 18511878620

Electronic and Information Engineering Huazhong University of Science and Technology

WORK EXPERIENCE

2011.7–now

Baidu Beijing BaiduLvyou(<http://lvyou.baidu.com>) web front–end development T4 engineer

2011.3–5

Baidu Beijing BaiduLvyou web front–end development internship

2010.6–9

Shenzhen Tencent QQ zone page reconstruction internship

2009–2011

University of Science and Technology BINGYAN workshop content group leader

JOB SKILLS

1.Years of experience in front–end development. Know well html5,css3,web–page framework and layout.

2.Familiar with the Javascript language.Familiar with jQuery and Angular, requireJS. Skillful at MVC&MVVM design model. Know about SVG, using RaphaelJS & Snapsvg. Familiar with FIS,Grunt,Yeoman web develop frameworks.

3.Several development experience in PC&MOBILE platform. Familiar with multi–browser compatibility issues. Familiar with the web front–end performance optimization.

4.Understanding the smarty template and PHP development. Understanding NodeJS and MongoDB.

5.Familiar with Unix, Windows development environment, Git/SVN version management tools, Sublime, PhpStorm and other IDEs.

6.Familiar with Photoshop, Fireworks, Illustrator and other graphics processing software .

7.Attaches great importance to the user experience and details.

[illegible]

Promote UE design specifications, promote using iconfont, unify rules in design and code

Due to there are many design persons, the design style is not unified, resulting in increased development costs. I promote the design department completed a set of common components design rules, and according with it I complete a css frameworks similar with Bootstrap and Foundation.

I push to use iconfont to unified handling icons, convenient for PC and the responsive of the MOBILE development.

Promote and Use AngularJS develop the Key project – Travel Plan Version 2

Although the develop time was pressing, after analysis the main functions, in charge of this key project, i decide to use the AngularJs. Although this was our first try in projects, but as a result, it was very successful to help us greatly improve the efficiency, in the short term to complete the extremely complex front-end interactive functions.

Multiple mobile development project pages

Multiple project development, use css3 to reduce page loading images and using EJS front-end template to reduce data maintenance cost.

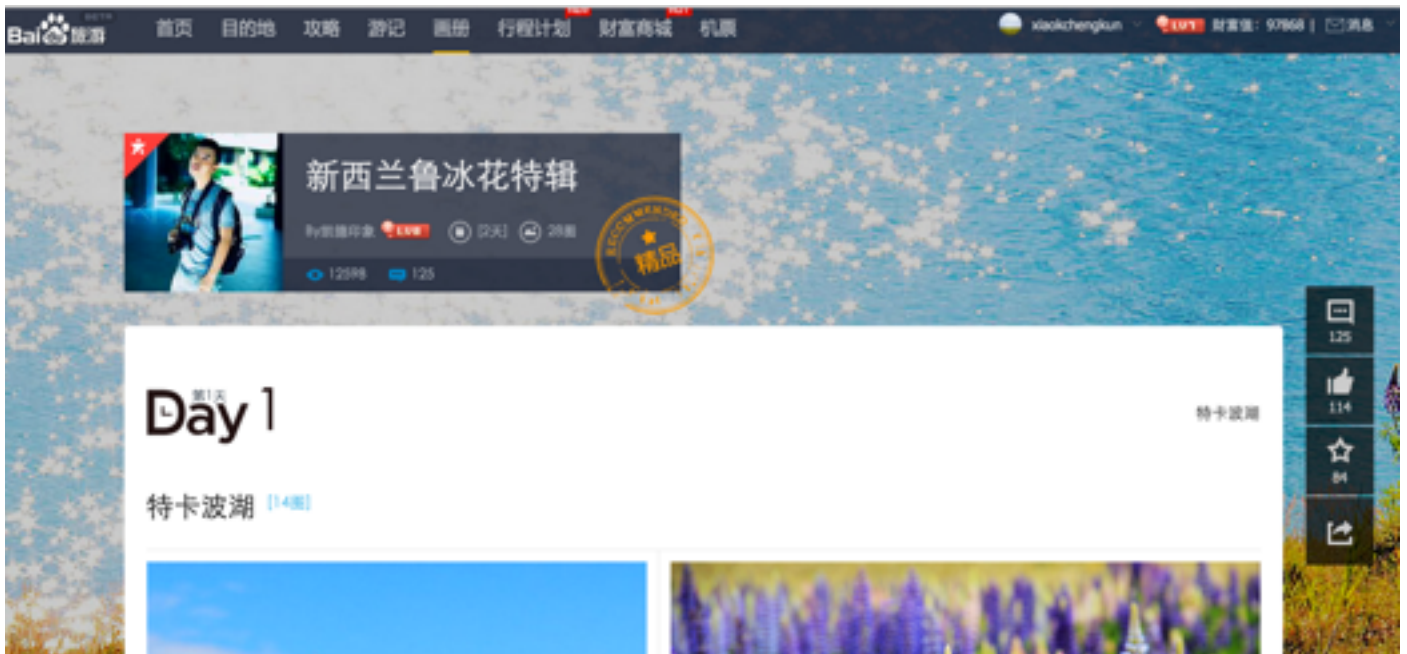

2013

Travel Book

Also a pressing project. As the project leader, I was first try to deploy the development framework with FIS2, and solved a number of technical difficulties. (example: <http://lvyou.baidu.com/user/d1703902f6bdae2b4d5fe99d>)

1. Based on a single page app design, using html5 Pushstate to refresh page.
2. Use SVG to draw maps of China and the World. Use PhantomJS to share users interface screenshots.
3. Design the icon myself, using css3 and one div to complete icons to fit the multi-resolution terminal. Also create many interesting icon animation.

Travel Plan Version 1

Using the MVC design to complete the extremely complex front-end interactive page. As an innovation interact, it improve the operation experience.(now it's offline)

1. Pack many complex functions with the BaiduMap and GoogleMap api in a independent ui, use the same interface to other developer.
- 2.Operator with drag and drop, and update the data in user client and server client the same time. Each step is saving with the AJAX, avoid the loss of data.

2012

As the fast development year of BaiduLvyou, in charge of reconstruction and optimization of multiple code modules , so that team work efficiency is greatly improved.

As the leader of some important and complex projects, I take control of the progress and the quality of the development.

Travel Photo Show

Open up a whole new type of photo show in web page. According to the photos size to choose the most suitable template to display images. Use innovative solutions such as drag and drop to arrange the photos in edit page.(<http://lvyou.baidu.com/pictravel/>)

2011

Involved in the construction of BaiduLvyou from 0 to 1, responsible for the development and maintenance of multiple modules.

Responsible for the development rules such as HTML,CSS of this new team.

PERSONAL PROJECT

CSSFONT & SVGFONT

Alone design and write code and complete a set of suitable for PC and MOBILE icon, support responsive and contain many interesting animation effects.

The NBA LOTTERY

Database use MongoDB, server language use NodeJs, front-end use AngularJs, complete a NBA basketball match results prediction system. Automatic fetching game data from sports websites everyday then storage and analysis to predict the coming game's result.

365REPLY

Also use NodeJs and AngularJs and Bootstrap to complete a site monitoring platform. Listening to the website that has inactivity time activity, filtering keywords, and through the site's CSRF vulnerability to automatically post the answers.

The screenshot displays the 365REPLY web application interface, which is divided into several functional sections:

- 目标uid (Target UID):** A section at the top left with a text input field containing '1878604' and a red button labeled '365头条 测试'.
- 当前参与用户 (Current Participating Users):** A section below the target UID, featuring two dropdown menus. The first is set to 'xiaokchengkun' and the second to 'We Are One'. Below these are input fields for 'xiaokchengkun' and '用户ID'.
- 开始抓取微博 / 停止抓取微博 / 开始抓取评论 / 停止抓取评论:** A row of four buttons (blue, red, blue, red) for controlling the data fetching process.
- 最新微博内容 (Latest Weibo Content):** A section on the top right showing lottery results for 348期3D, 348期排列三, 348期排列五, 150期大乐透, and 150期七乐彩, dated 12月22日 21:38. It includes a red button '测试桌面通知'.
- 目标微博问题 (Target Weibo Question):** A section below the latest content, currently showing '暂无' (None).
- 回复微博 (Reply Weibo):** A section at the bottom right for replying to a specific Weibo post. It includes input fields for '目标微博id' (77506720), '当前提交用户id', and '当前问题答案' (#我爱世界杯#这是), along with a blue '回复评论' button.
- Log Console:** A terminal-like window at the bottom left showing a series of status messages and timestamps (0:59:41) related to the data fetching process.

OTHERS

Good at communication skills and team work .

Intense curiosity on the web newest technology , a good learning ability, strong initiative and responsibility.

Hobbies : football , badminton , singing , riding , travel, electronic games , ACG , Gundam, and Majiang .
